ABSTRACTED-PUB-NO: JP 05139924A

BASIC-ABSTRACT:

Plant disease control agent contains extract, or one or more components of natural flavours. Also claimed are (1) extract of one or more components of natural prods. such as cinnamon, cassia, clove, honoki, eucaryptus, mentha, spearmint, cumin, star anise and caraway which contain cinnamaldehyde, eugenol, hinokitiol, cineol, menthol, carvone, cuminal and anethole, (2) extracts of tea contg. catechins or saponins, and (3) prevention of plant diseases by the agent.

Essential oils are extracted from claimed plants by conventional methods (e.g. extn. with organic solvent or steam distn.) and are used to prepare conventional agricultural compsns. using known additives and carriers.

USE/ADVANTAGE - The essential oil extracted from claimed plants are effective against pathogens of plant diseases without environmental pollution
